

## Canopi Sensor for Diesel Gensets

### Canopi Sensors

- **Canopi Sensor for diesel gensets features:-**
    - Canopi Sensor is the sensor which is used in diesel gensets for avoiding overheating of gensets. When the temperature reaches 85°C or more the sensor indicates the overheating of the genset and indicated to the AMF panel and thus shutting down the genset to avoid damage to the gensets...
